WPC Recommendation 24
Indigenous Peoples and Protected Areas

Indigenous peoples, their lands, waters and other resources have made a substantial contribution to the conservation of global ecosystems. For this trend to continue, where appropriate, protected areas, future and present, should take into account the principle of collaborative management attending to the interests and needs of indigenous peoples.

Many protected areas of the world encroach and are found within and overlap with lands, territories and resources of indigenous and traditional peoples. In many cases the establishment of these protected areas has affected the rights, interests and livelihoods of indigenous peoples and traditional peoples and subsequently resulted in persistent conflicts.

Effective and sustainable conservation can be better achieved if the objectives of protected areas do not violate the rights of indigenous peoples living in and around them.

It is widely acknowledged that successful implementation of conservation programmes can only be guaranteed on long term basis when there is consent for and approval by indigenous peoples among others, because their cultures, knowledge and territories contribute to the building of comprehensive protected areas. There is often commonality of objectives between protected areas and the need of indigenous peoples to protect their lands, territories and resources from external threats.

In addition to the benefits to conservation, it is also necessary to acknowledge that indigenous peoples have suffered human rights abuses in connection with protected areas in the past and in some cases continue to suffer abuses today.

Resolution WCC 1.53 Indigenous Peoples and Protected Areas, adopted by IUCN members at the 1st World Conservation Congress (Montreal, 1996), promotes a policy based on the principles of:

1. Recognition of the rights of indigenous peoples with regard to their lands or territories and resources that fall within protected areas;

2. Recognition of the necessity of reaching agreements with indigenous peoples prior to the establishment of protected areas in their lands or territories; and
3. Recognition of the rights of the indigenous peoples concerned to participate effectively in the management of the protected areas established on their lands or territories, and to be consulted on the adoption of any decision that affects their rights and interests over those lands or territories.

At the request of the World Commission on Protected Areas (WCPA), IUCN's Council endorsed in 1999 "Principles and Guidelines on Indigenous Peoples and Protected Areas", in response to actions called for in Resolution WCC 1.53. In addition, several intergovernmental bodies and international agreements, as well as international conservation organizations, have adopted and promote policies that support recognition of the rights and interests of indigenous peoples in the context of biodiversity conservation and protection of the environment.

Therefore, PARTICIPANTS in the Cross-Cutting Theme on Communities and Equity and in the Stream on Governance at the Vth World Parks Congress, in Durban, South Africa (8-17 September 2003) stressing that the following recommendations shall be conducted in full partnership with the freely chosen representatives of indigenous peoples:
